

VIVISTA

How to connect a HTC Vive Cosmos to Vivista?

1. First of all, you need SteamVR. Vivista is developed with Unity, which runs on SteamVR. To install SteamVR, you first need to install Steam. Surf to <https://store.steampowered.com/about/> and install Steam.

2. After installing Steam, you can then install SteamVR. Type the search term 'SteamVR' in the search bar on the left side of your screen, after which you can select and install SteamVR.

3. Go to <https://www.vive.com/eu/setup/> and click on the button to download the Vive Setup.

4. When opening this file, you will be asked to agree to their terms of use and privacy policy. To view their contents, click on the desired section.

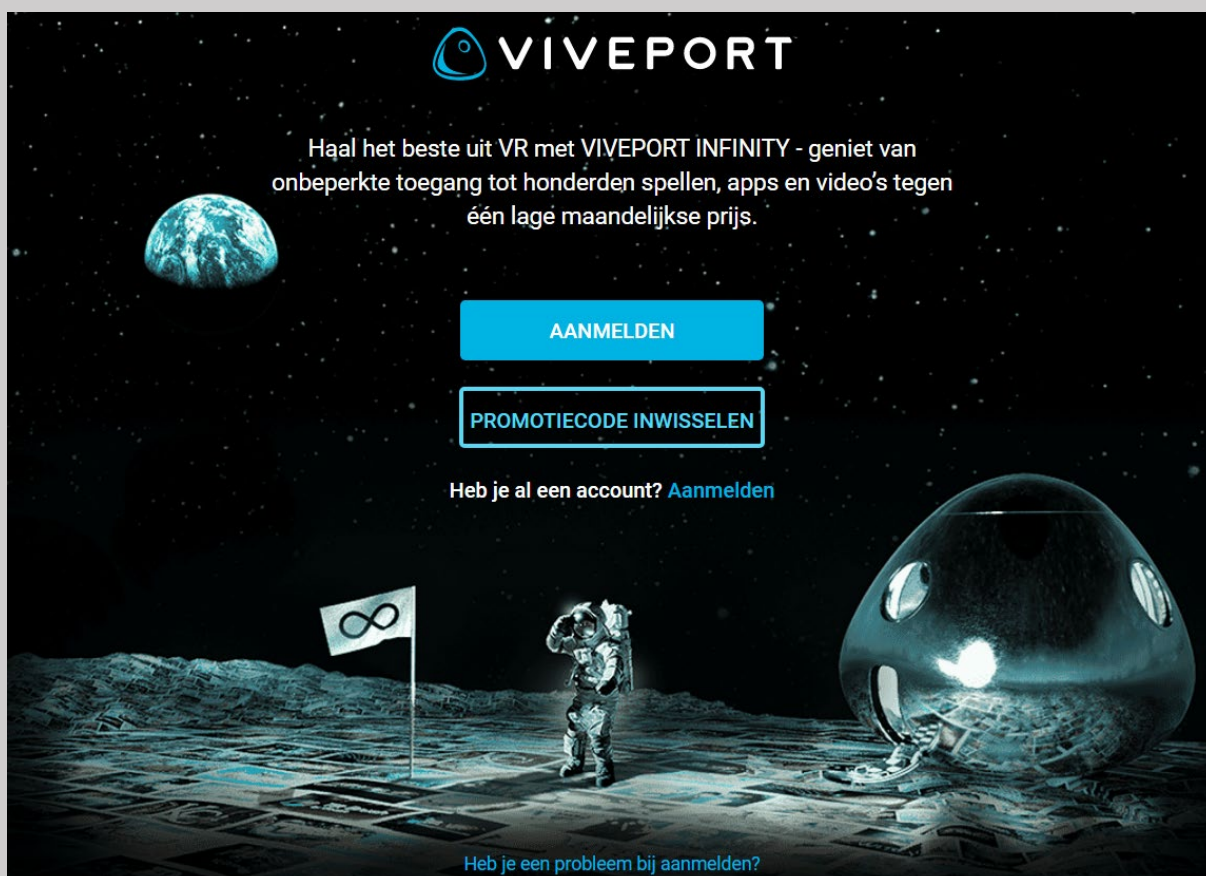

5. Follow the suggested steps during the installation process.

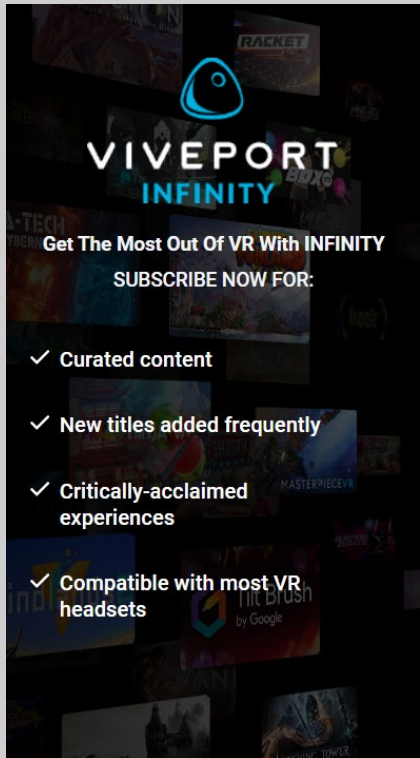

* *Make sure you have at least 18.5GB of disk space free.*

6. Create a free account on VIVEPORT by clicking on 'REGISTER' or if you already have an account, click on 'Do you have an account? Sign up'.

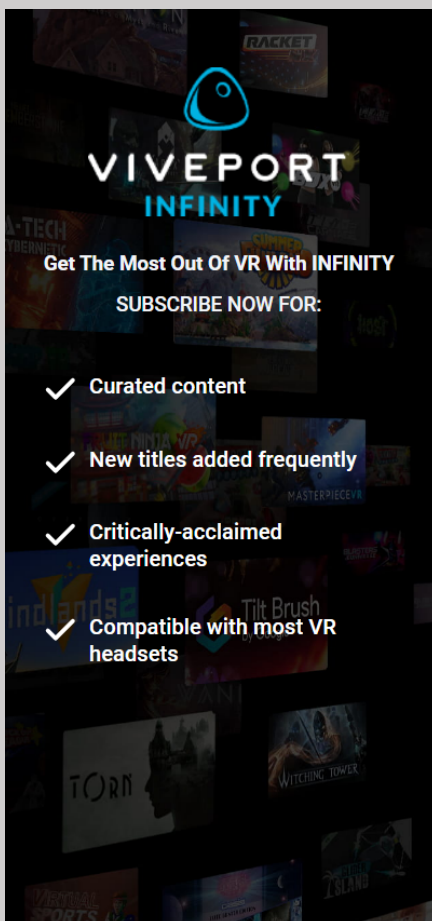

7. If you do not yet have an account, you must create one by filling in your details and following the suggested steps.

The 'ACCOUNT MAKEN' (Account Make) page on the Viveport website. At the top left is the Viveport logo. To the right, it says 'Heb je al een account?' (Do you already have an account?) with a link 'Inloggen' (Log in). The main heading is 'ACCOUNT MAKEN'. Below this, there's a section 'Account bij sociale media aanmaken' (Create account on social media) with icons for Google and Oculus. A separator line follows, with the text 'Of maak met e-mail/telefoon' (Or create with email/phone). There are two input fields for 'Voornaam' (First name) and 'Achternaam' (Last name), each with a question mark icon. Below these is an 'E-mailadres' (Email address) field. Then, there are two password fields: 'Wachtwoord' (Password) and 'Wachtwoord bevestigen' (Confirm password), with an eye icon to toggle visibility. A 'Locatie' (Location) field shows 'Belgium' with a dropdown arrow. At the bottom is a large blue button labeled 'VOLGENDE' (Next).

8. When you have almost completed the installation process, you will see the screen below. Do not feel obliged to take out a subscription! You can click on 'Maybe later' at the bottom.

The 'DOE MEE MET INFINITY' (Join Infinity) page on the Viveport website. At the top left is the Viveport logo. The main heading is 'DOE MEE MET INFINITY'. Below this, there are two subscription options presented in rounded rectangular boxes. The first box is for 'INFINITY MONTHLY' and shows a price of '€14.99/MAAND'. It lists benefits: 'Try 14 Days Free', 'Pay Monthly', 'Unlimited Access', 'Hundreds of VR Experiences', and 'Exclusive Offers and Discounts'. Below this box is a blue button labeled 'SUBSCRIBE NOW'. The second box is for 'INFINITY ANNUAL' and shows a price of '€9.99/MAAND' with 'Annual commitment' written above it. It lists benefits: 'Try 14 Days Free', 'Annual Plan, Paid Monthly', 'Premium Titles', 'Unlimited Access', 'Hundreds of VR Experiences', and 'Exclusive Offers and Discounts'. Below this box is a blue button labeled 'SUBSCRIBE NOW'. At the bottom of the page, there is a blue button labeled 'Misschien later' (Maybe later) and a link 'Heb je een code om in te wisselen?' (Do you have a code to swap?).

9. The installation of the software "VIVEPORT" is now complete, so you can start configuring the VR headset and controllers in the next step.

VIVEPORT
WELKOM BIJ VIVEPORT

You're currently registered as an Infinity Lite user which enables you to browse and make purchases from the Viveport Store and gives you access to a selection of curated free titles.

You can upgrade to an Infinity subscription plan to gain unlimited access to hundreds of titles and other member benefits.

OK

10. Select the headset you are going to configure, which is the Vive Cosmos. When you select it, you will immediately be given the option to download the necessary software for this headset.

APPARAATCONFIGURATIE [Overslaan en gaan naar VIVEPORT](#)

Kies het apparaat dat je wilt configureren. Na het downloaden van het installatieprogramma volg je de stapsgewijze installatie-instructies voor het configureren van je apparaat.
Je kunt je apparaat later configureren vanuit Instellingen > Apparaatconfiguratie

11. Now you have arrived at the last step, which is to configure the headset and controllers. To do this, you need to follow the suggested steps.

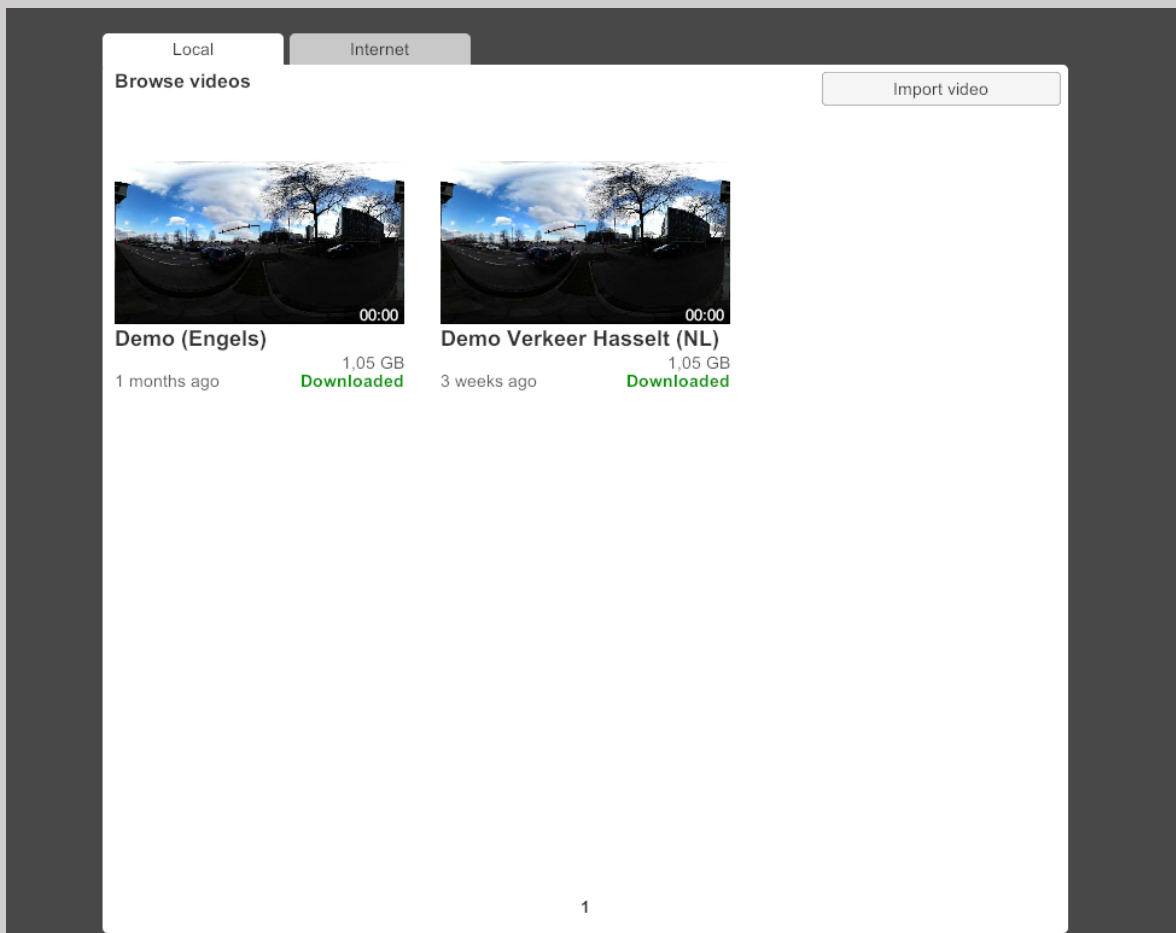

12. When you have completed this last step, you will see the screen below. When you click on "START ROOMSETUP", you will be given a demo and introduction to the operation of this headset.

13. Once you have completed the previous steps, you can open the Vivista Player. You only need to open the software with your computer mouse, but you don't need to select a 360° video yet. SteamVR will take care of recognising your headset in the background and establish a connection between Vivista and the headset. To select and view a 360° video, you can use the headset and controllers.

**Please note that your headset must always remain connected using the supplied cables.*

14. When you open the Vivista Player, the screen below will also open. Make sure the controllers and the headset are connected to the laptop or desktop, so that they are all set to 'ready'.
